Re: Modification of VPDES Permit No. VA0023299
Gunston Elementary School Wastewater Treatment Plant, Fairfax County

Dear Mr. LaCroix:

The Department of Environmental Quality (DEQ) has modified the effluent limitations and monitoring requirements for the aforementioned permit based on the Certificate to Operate that was issued on 3 October 2013. It should be noted that chlorine limitations have been removed since disinfection was replaced with ultraviolet light. The facility is now required to monitor and report *E. coli* at a frequency of once per week as set forth in Part I.B.1.e of the referenced discharge permit.

The eDMR program will reflect this reporting requirement for the month of November 2013 which is due by 10 December 2013. Please reference the effluent limits in your permit and report monitoring results in eDMR to the same number of significant digits as are included in the permit limits for the parameter.

Should you have any questions regarding the eDMR system, the regional contact is Rebecca Vice. She may be reached at 703-583-3922 or via email at Rebecca.Vice@deq.virginia.gov.

Please contact Douglas Frasier at 703-583-3873 or via email at Douglas.Frasier@deq.virginia.gov, should you have any questions regarding the permit.

Respectfully,

Bryant Thomas
Regional Water Permits & Planning Manager
